
CEMENT PAINT

Product Description:

Waterproof Cement Paint is a high-performance, durable coating formulated to protect and enhance masonry surfaces. It is designed to provide a weather-resistant, water-repellent finish that safeguards walls against moisture, fungi, and algae. Ideal for both interior and exterior applications, this cement-based paint offers excellent adhesion and breathability, ensuring long-lasting protection.

Health and Safety:

- **Precautions:** Wear gloves and eye protection, ensure good ventilation, and avoid skin and inhalation contact.
- **Storage:** Store in a cool, dry place, away from sunlight and children.

Quality & Durability:

Resistant to water penetration and dampness
Anti-fungal and anti-algae properties
UV-resistant to prevent fading and chalking
Long-lasting, ensuring **5+ years of durability** under normal conditions
Breathable finish prevents trapped moisture

APPLICATION INSTRUCTIONS

Surface Preparation

1. Ensure the surface is clean, dry, and free from dust, dirt, grease, or loose particles.
2. Remove old flaking paint, algae, or fungi using a wire brush and suitable cleaning agents.
3. Dampen the surface with clean water before application to enhance adhesion.

Application

1. Apply using a brush, roller, or spray in two coats.
2. Ensure a **4-6 hour drying time** between coats.
3. Keep the surface damp for at least **24 hours** after application for enhanced durability.

Technical Details

- **Composition:** High-quality Portland cement, pigments, and waterproofing agents
- **Color:** cement
- **Drying Time:** Touch dry in **30-45 minutes**, complete drying in **24 hours**
- **Coverage:** **16 meters per gallon**, depending on surface porosity
- **Water Resistance:** Excellent after full curing

Uses:

- Exterior and interior walls
- Residential and commercial buildings
- Concrete, plastered, and brick surfaces
- Boundary walls and fences
- Sloped roofs and parapet walls
- Basements and damp-prone areas
