

Technical Data Sheet

PRODUCT:

Rolotex Naturo Textures: Artistic exterior plaster for unique architectural designs. This off-white colored plaster is 2mm thick, applied with a trowel, resulting in captivating patterns. Crafted from a blend of marble powder, silica sand, and quartz, all bound together with acrylic for superb durability. Its exceptional adhesion ensures it is crack-resistant and flexible. Available in small, medium, big, and jumbo lines, offering endless surface design possibilities. Customize further with your preferred primer and paint options to achieve your desired aesthetic.

Surface preparation

Ensure that the wall's surface is free from dust, oil, grease, paints, loose foreign particles / materials, wetness or dampness and curing agents which may otherwise affect adhesion. Fill the cavities in the wall surface.

Mixing & Application

Transfer the complete bag material into a clean tub / bucket, To get the mix of required consistency, ½ to 1 liter of clean water can be added to a bag of 25 kg and mixed thoroughly. The above material should be free from lumps. Apply the material on dry wall with a quality roller. Need skilled applicator/worker. Leave the surface to dry for 72 hours.

Coverage

5 sft / kg in single coat.

Shelf life

6 months in unopened ideal condition.

Storage

Store in moisture-free dry place.

Application Area:

- To be applied on sponge finish plaster surfaces.

Technical specs:

Sl. No.	Attributes	Standard	NCL BUILDTEK CONFIRMS
---------	------------	----------	-----------------------

1	Color	mfg specifications	As per standard
2	pH	mfg specifications	7.5 to 8.5
3	Toxicity	mfg specifications	Non toxic
4	Wt/Litre	mfg specifications	1.70 to 1.75gm/cc
5	No of coats	mfg specifications	Single coat
6	Touch dry at 30°C	mfg specifications	60 minutes

Precautions

- Keep out of reach of children.
- Keep in dry place.
- Avoid inhalation of dust.
- If the eye accidentally comes in contact with the material or you feel irritation of the skin due to contact, use plenty of plain water to wash the affected area. Consult a doctor if necessary.
